

JOANNA NAPORA

JUNIOR DEVELOPER

PERSONAL PROFILE

I am a highly motivated and hard-working person who wants to change their profession. I'm learning React and JavaScript since August 2020. My knowledge comes from Udemy courses, , exercises on CodeWars, but most of all from a huge amount of hours studying with an experienced software engineer. So far I finished my own 4 React projects. Two of them are complete websites (including backend) and 2 are games (Memory Game and Sudoku). I am learning and coding every single day, looking for the company where I could spread my wings.

SKILLS & ABILITIES

- React
- Redux
- TypeScript
- JavaScript
- REST API
- git
- GraphQL
- Axios
- SASS
